

TOPIC: Campus Crime Reports

COMMITTEE: Education Policy

DATE OF COMMITTEE MEETING: March 16, 2011

SUMMARY: The data included in this annual report are drawn from the Campus Security Statistics website of the Office of Postsecondary Education of the U.S. Department of Education. The site was authorized by Congress with the 1998 amendment to the Higher Education Act of 1965 (HEA) to help potential college students and their parents research criminal offenses on college campuses. The Department of Education requires that, by October 1 of each year, each institution that is Title IV eligible is required to publish and distribute an annual campus security report to all current students and employees.

The statistics found on the OPE website represent alleged criminal offenses reported to campus security authorities and/or local police agencies. Therefore, the data collected do not necessarily reflect prosecutions or convictions for crime. Because some statistics are provided by non-police authorities, the data are not directly comparable to data from the FBI's Uniform Crime Reporting System which only collects statistics from police authorities.

The tables on crime reports for 2007, 2008, and 2009 include criminal offenses that occurred on campus. They also include data for on-campus arrests, as well as campus disciplinary actions and judicial referrals, for liquor law violations, drug abuse violations, and illegal weapons possession. (Tables for earlier years are available upon request.) Also attached is a glossary that provides definitions for the various terms used in the reports.

Federal regulations also require separate reporting of hate offenses. Very few hate offenses have occurred at USM institutions over the reporting period, and therefore these have not been displayed in a tabular format. In the three-year period included in this report, only one hate crime occurred – an assault involving bodily injury at UMCP in 2007.

Again this year, in addition to total number of reported incidents, the tables provide a rate that reflects total number of incidents per 1,000 students (based upon fall headcount enrollment) so that crime statistics may be compared appropriately from year to year and between institutions. A trend table showing five years of data (total number of incidents in each category) is included.
