

**BOARD OF REGENTS**

**SUMMARY OF ITEM FOR ACTION,  
INFORMATION, OR DISCUSSION**

---

**TOPIC:** Report on Extramural Funding, FY 2013

**COMMITTEE:** Education Policy and Student Life

**DATE OF COMMITTEE MEETING:** January 14, 2014

**SUMMARY:** This report provides information on extramural awards received by USM institutions in support of specific initiatives in research, education, or service in FY 2013; in addition to detailed information by institution and funding source for FY 2012 and FY 2013, the report also provides five years of summary data by institution for comparison purposes. It is important to note that while the report on extramural awards is consistent within the USM, it is not directly comparable with NSF accounting-based reports based on national standards nor with expenditure data in System budget documents.

In FY 2013, the System received \$1,197,988,411.33 in extramural funding, a 6.6% decrease from the FY 2012 total of \$1,282,960,256.07. UMB and UMCP garnered the largest extramural funding totals among System institutions. BSU, TU, UB, UMBC, and UMUC obtained higher levels of extramural funding than in FY 2012. Several institutions accounted for the overall decline in funding.

**ALTERNATIVE(S):** This item is for information only.

**FISCAL IMPACT:** This item is for information only.

**CHANCELLOR'S RECOMMENDATION:** This item is for information only.

## USM EXTRAMURAL FUNDING REPORT FY 2013

Major sources of support for the activities on the campuses of the USM institutions come from extramural sources, including grants and contracts. The faculty and staff of the USM institutions obtain funding for research, education, and public service activities from many sources. This report shows how many proposals each institution generated, how many awards were received, and the total amount of funding received from external sources.

In FY 2013, the System received a total of \$1,197,988,411.33 in extramural funding, a 6.6% decrease from the FY 2012 total of \$1,282,960,256.07. In spite of the decline, it should be noted that once again, the proportion of the total budget accounted for by extramural funding exceeded that accounted for by either state general funds or tuition and fee revenue.

The decrease in extramural funding may be attributed to many factors, but it is recognized that the amount of federal funding available has not been increasing as it has in previous years. The large amount of short term funding from American Recovery and Reinvestment Act has now been utilized. Federal funding has been more challenging as many of the projects have larger budgets, but the “pie” available has not grown. Moreover, federal funding agencies were also significantly affected by the March 1, 2013 implementation of the Sequester. The federal research budgets of some funding agencies were at the lowest levels in years in FY 2013, largely due to the Sequester. Federal agencies prepared for and then responded to the Sequester by either reducing the number of new awards made under competitions or canceling competitions outright. Subsequently, while more proposals were submitted in FY 2013, about the same number of awards were received.

Awards are counted in the year they are received. By contrast, reports issued by government agencies, such as the National Science Foundation (NSF) provide data on expenditures, not awards, for research; expenditures may be verified by accounting procedures but the data lag behind the receipt of awards by years.

Table 1 shows how much income each institution generated in each of the past two years from grants and contracts from the federal government, from Maryland state agencies, from non-profit foundations, from corporations, and from other sources, such as non-governmental organizations. Table 1 also shows the number of proposals submitted to each type of funding source and the number of grants received. It should also be noted that in this report the number of awards represents not only new awards but also amendments to existing awards that provide additional funding not previously accounted for. Institutions that receive a high percentage of awards funded in increments will have a higher number of awards than proposals, since one initial proposal could result in multiple funding actions. It should also be noted that some awards received were the result of proposals submitted in a prior fiscal year and that notification regarding the funding of some proposals submitted in FY 2013 were still pending as the fiscal year closed.

At every institution, extramural funding derives from a variety of sources. Although the federal government is the largest funding source for the System as a whole and for research-intensive institutions, state government, corporations and foundations, and other sources provided support on the same order of magnitude as federal funds for the regional comprehensive universities.
