BOARD OF REGENTS

SUMMARY OF ITEM FOR ACTION, INFORMATION OR DISCUSSION

TOPIC: 2014 USM Dashboard Indicators

COMMITTEE: Finance

DATE OF COMMITTEE MEETING: March 12, 2015

SUMMARY: Each year, the Board of Regents receives the Dashboard Indicators (DBIs) which summarize critical measures of success and compliance in a wide array of Board initiatives. The DBIs are organized into categories based on the USM Strategic Plan. The indicators displayed are meant to remain reasonably stable over time in order to provide the Regents with a ready comparison to past performance. They also feature benchmarks wherever possible against either peers or based on Board or institutional policy. The DBIs include pages of indicators focused on the external environment, the System as a whole, and each USM institution.

In each year's DBIs, specific issues are highlighted in a single page summary. Key issues highlighted in this year's Dashboard Indicators include:

- Facilities Renewal,
- Enrollment, Financial Aid & Student Success, and,
- Economic Development.

ALTERNATIVE(S): This item is presented for information purposes.

FISCAL IMPACT: This item is presented for information purposes.

CHANCELLOR'S RECOMMENDATION: This item is presented for information purposes.

2014 USM Dashboard Indicators Key Indicators

The 2014 Dashboard Indicators provides a "snapshot" overview of the USM and its institutions. It brings together data from many USM reports and data sets. The indicators noted below were selected to highlight specific trends and challenges drawn from the Dashboards.

Fiscal Indicators

Facilities Renewal – No USM institution met the Board of Regent's benchmark goal for
facilities renewal as two percent of replacement value in FY 2014 and only two institutions
were able to maintain or improve their performance at all. This is reflective of the fiscal stress
being experienced by USM institutions and is unlikely to rapidly improve under present
circumstances.

Indicators Related to Enrollment, Financial Aid Availability & Student Success

Progress under indicators tied to enrollment growth, financial aid, and student success was mixed in 2014. While indicators tied to student retention and institutional aid pointed up in FY 14, enrollment-related indicators moved downwards. A summary of 2014 progress in this area shows the following:

- Retention 2nd year retention rates held or improved at 8 of 9 institutions in the USM. This is
 a critical indicator to monitor, particularly at institutions that have expanded enrollment to
 meet USM completion goals, because it represents a key first step in moving students through
 to graduation. It is also among the most commonly cited figures in discussions of institutional
 quality and efficiency.
- Institutional Financial Aid Institutional aid is a key element in all of USM's student success and completion plans. That aid rose to record levels in FY 2014. Additionally, the percentage of dollars devoted to institutional aid, when compared to tuition revenue, rose slightly and has been maintained even as enrollment has grown over the last several years.
- Maryland Community College Transfers The total number of Maryland Community College transfers to USM fell for the first time in several years. The number dropped by 700 overall and at 6 of 10 institutions, including Towson and UMUC, which historically have admitted the largest transfer classes. Although the level of transfers remains very high, this change is important to monitor given the USM's increased focus on transfers.

Economic Development Indicators

A number of key indicators tied to economic development, both in research and workforce development, showed improvement in FY 14. These include:

- Company Creation, Patents and Licenses Creation of start-up companies continued to grow robustly, and patents issued, and licenses and options executed rose this year. UM-College Park led the way with over 100 companies created. Six institutions in total were credited with creating companies in the last year. This places the USM well along the path to its Strategic Plan goal of creating 325 companies by 2020. Performance on patents and licenses also equaled or exceeded performance in these areas over the last several years.
- **Upper Division STEM Enrollment** This measure is a leading indicator of progress on the State's and the USM's commitments to increase Science, Technology, Engineering, and Math (STEM) degrees. From Fall 2013 to Fall 2014 this figure rose by more than 2,000 students, outstripping the total increase in STEM students at all levels. The change in this year's upper division STEM enrollment numbers should translate into an increase in the number of undergraduate STEM degrees awarded this year by at least 500 additional degrees.
