

---

**TOPIC:** USM Enrollment Projections: 2016 – 2025

**COMMITTEE:** Finance

**DATE OF COMMITTEE MEETING:** March 31, 2016

**SUMMARY:** Each year, the institutions update their enrollment projections for a 10-year period. The USM Office works in concert with the institutions to insure the accuracy of these projections by providing them with supporting data and analysis of current and past trends. Any significant issues are resolved and the projection submission is modified where necessary.

Highlights of this year's institutional projections include:

- Overall projected headcount is projected to increase in Fall 2016 by 4%, an increase from 164,501 to 170,200. This is driven almost exclusively by UMUC's growth and consolidation of worldwide enrollment. Without UMUC growth to Fall 2016 is expected to be below 1%.
- Overall projected headcount growth for the ten-year period is 17%, an increase from 164,501 to 192,286.
- Undergraduate enrollment is projected to expand 18% over ten years from 122,836 to 145,367.
- Graduate enrollment is projected to grow by 13% for the ten-year period from 41,665 to 46,919.

**ALTERNATIVE(S):** The Committee members may request changes in the projections.

**FISCAL IMPACT:** The fiscal impact of the projected enrollment growth will depend on many factors, including availability of facilities to accommodate increased enrollments, program of study of future students, availability of faculty, and in/out-of-state residency status.

**CHANCELLOR'S RECOMMENDATION:** That the Finance Committee recommend that the Board of Regents approve the enrollment projections as submitted.

# **USM Enrollment Projections Fall 2016 through Fall 2025**

**Submitted to the Board of Regents' Committee on Finance  
March 31, 2016**

**Office of the Chief Operating Officer /  
Vice Chancellor of Administration and Finance**

## **Enrollment Projections: 2016 – 2025**

### **Overview**

The USM enrollment projections for the period of 2016 through 2025 indicate that the USM will grow very slowly, particularly at our residential campuses. Growth in the immediate term is driven almost solely by increases at UMUC. That growth represents actual growth at the institution but also the consolidation of enrollment from worldwide operations through UMUC's main "campus." After an initial increase because of this change, growth is expected to be 1.0-1.5% per year throughout the 2016-2025 timeframe.

Long-term growth over the next ten years is expected to be around 28,000 students, with total enrollment projected to come in at 192,000 by 2025. In the short term, enrollment is expected to rise by around 7,000 over the next 2 years, starting with a 4% increase during the current academic year (Fall 2014 to Fall 2015). UMUC drives that growth almost entirely in the short term. Towson, UMBC and the HBCU's make significant contributions with UMUC to the long term growth.

### **The Report**

Tables 1 through 15 summarize the ten-year projections from 2016 to 2025 by institution, by student level, and by overall enrollment demand. The tables also provide detailed projections for each institution and for the entire System over this period.

Highlights of this year's projections include:

- Overall headcount enrollment for the ten-year period is projected to increase from 164,501 to 192,286, an increase of 16.9%. Between Fall 2015 and Fall 2016, headcount enrollment will rise by 3.5%, or approximately 1,000 students. If UMUC is excluded, then projected growth over the ten-year period will be 8.2% (rising from 114,253 in Fall 2015 to 123,611 in Fall 2024). The one-year growth is entirely driven by UMUC, when UMUC is excluded enrollment rises 0.6% or by only 675 students (see Table 1).
- Undergraduate headcount enrollment over the ten-year period is projected to expand from 122,836 to 145,367, an 18.3% increase by 2025. Headcount enrollment from Fall 2014 and Fall 2015 is projected to rise by 4.3%, an increase of more than 5,000 students. This undergraduate growth is again, in the short term, driven by UMUC's growth and enrollment consolidation. Total undergraduate growth for the ten-year period for all USM institutions, excluding UMUC, is projected to be 9.0%. Excluding UMUC, headcount enrollment will grow between Fall 2014 and Fall 2016 by just 0.8%, or 650 students (see Table 1).
- Excluding UMUC, in percentage terms the greatest one-year increase in headcount enrollment is projected to be at UMES, with expected growth of 2.8%. Coppin and

Salisbury are planning for growth over 1%. All of the other campuses are planning for extremely modest growth below 1%.

- One-year FTE growth is projected to be greatest in percentage terms at Coppin (over 8%) and UMES (3.3%). With the exceptions of UMB and UMUC, all other institutions report growth rates almost identical to those of their headcount indicating that they do not plan on altering the general full-time/part-time mix of students. UMB projects a very small decline reflecting essentially flat enrollment with some realignment of undergraduate and professional programs. UMUC is projected to grow only 1.0% in terms of FTE (versus 10% in headcount) reflecting that virtually all of the added enrollments are for part-time students.
- For the ten-year period, patterns projected by most of the USM institutions remain consistent with those provided in the last few years' projections with a couple of key exceptions. Bowie, Coppin, and UMES continue to project robust growth at both graduate and undergraduate levels (between 21% and 37% growth). Frostburg, Salisbury, Towson and UMBC plan to expand enrollment at modest rates (5%, 8%, 10% and 9% respectively). UMB is expecting very modest growth (2%) entirely at the undergraduate level. UMCP is expecting a slight decline (-0.2%). The first exception to the earlier projections is University of Baltimore. UB is projected to grow (+12%) but at only around half the rate (25%) projected last year. The second exception is UMUC. UMUC plans to grow 37% over the ten-year period, but of 10% of that growth will occur in the first year and will largely be driven by the consolidation of enrollment from worldwide sources in the UMUC figures. This will be followed by two years of 1-1.5% growth which is very low by UMUC standards.
- In terms of headcount change, UMUC remains the largest single source of headcount growth, planning to add more than 18,000 students by 2026. Towson plans to enroll the most new students of all of the traditional campuses (2,100). UMES, UMBC, Bowie and Coppin together plan to enroll more than 5,300 students (1,800, 1,300, 1,100 and 1,100 respectively). UB, Salisbury, Frostburg and UMB plan to add smaller numbers (800, 700, 300, and 100 respectively) totaling 1,900 students. As a group, the HBCUs plan to add over 4,100 students. UMCP plans to marginally reduce enrollment through 2025 (see Tables 5 through 15).

Comments: The above projections take into account STEM and health profession programs and a ten-year target undergraduate enrollment of 5,325 students to make a significant contribution to Maryland's goal 55% of Marylanders with a college degree by 2025. Headcount undergraduate enrollment is projected to grow by 3.7% in fall 2015, while STEM and Health Profession programs will grow at at 7.5% and 2.9%, respectively. Health Profession enrollment has been adjusted in line with accreditor requirements for Pharmacy, and Physical Therapy programs. To ensure that more undergraduate students graduate on time and make efficient use of their resources, they will be encouraged to take at least 15 credits each semester. UMES continues to adjust its SAT threshold two component score to 800 and above to
