Financial Aid Report Data Tables Only

The original versions of the following data tables are found in the *Financial Aid Report FY 2007 – FY 2011* given to the USM Board of Regents Education Policy and Student Life Committee in October 2012. That complete report, as well as the data tables found here, provided updated data for the *USM FY 2004 Financial Aid Task Force* recommendations. As part of the FY 2014 ongoing financial aid study, the tables have been revised to display up-to-date trends and outcome information.

For the purposes of the discussion on March 4, 2014, the Committee will be briefed about the updated progress towards the *FY 2004 Financial Aid Task Force* recommendations. The data appear on pages 4-11. Additional financial aid aggregate data are also included in the appendix and included as reference.

Table 1 displays the total financial aid awarded to undergraduates and graduates. It includes grants, scholarships, loans, and work study from federal, state, and institutional resources. Just over half of all students depend on financial aid.

Recommendation #1: Reduce the undergraduate student loan debt burden for the students from the lowest income.

Students from the lowest income will have debt that is 25% less than students from high incomes.

Note: Data are updated for Fall 2006 to Fall 2012. For new freshmen, Pell students are designated at entry. Consistent with the annual Board of Regents reports, "Retention and Graduation Rates of First-Time, Full-Time Degree-Seeking Undergraduate Students," the graduation rates are measured in a six-year window. The "Total Loans" is a cumulative total of all undergraduate loans expended to cover educational expenses during the students' academic career in a USM institution.

- Fall 2004 to Fall 2007 includes all students that graduated within 6 years of entry (standard calculation for graduation rates). Fall 2008 to Fall 2012 cohorts have students still enrolled and final graduation rates have not been calculated.
- Of the graduates (Fall 2004 to Fall 2007), the Pell recipients at entry have graduated with approximately 25% less debt than their peer counterparts who did not receive a Pell Grant at entry.
- Of the students still enrolled (Fall 2008-Fall 2012), the Pell students at entry carry a debt balance at least 25% less than their higher income peers.

Note: Data updated for FY 2009 to FY 2013. For MDCC transfers, the Pell students are determined if a Pell grant is received anytime during undergraduate career at USM. Consistent with the annual Board of Regents reports, “Transfers Students to the USM: Patterns of Enrollment and Success,” the graduation rates of transfers are measured in a four-year window. The “Total Loans” is a cumulative total of all undergraduate loans expended to cover educational expenses during the students’ academic career in a USM institution.

- FY 2005 to FY 2010 includes all students that graduated within 4-years of entry (standard calculation for transfer graduation rates). FY 2011 to FY 2013 cohorts have students still enrolled and final graduation rates have not been calculated.
- Of the graduates (FY 2005 to FY 2010), the Pell recipients (any time during UG career) graduated with approximately 1-5% less debt than their peer counterparts who did not receive a Pell Grant during their undergraduate career.
- While transfer Pell students did not have the same lower debt difference as their freshmen counterparts, it is important to note that all transfer graduates accumulate a much lower average loan debt balance from USM than their freshmen peers. [Note: USM does not have data for any loan debt prior to attending USM institutions.]

Recommendation #2: Targeting Funds to Need-Based Aid Institutional Aid

USM institutions will rebalance the amount of institutional aid to increase the proportion of need-based aid available to undergraduate students.

Source: MHEC Maryland Student Financial Aid Information System

Note: Of the total increase in institutional aid, 50% of that increase went to need-based aid from FY 2004 to FY 2013. More recently, this rebalance has been accelerated to 58% from FY2009 to FY2013.

- Need-based aid as a proportion of total institutional aid increased +10% (29% in FY 2004 to 39% in FY 2013).
- Need-based aid more than doubled (+150%) from \$19.2M in FY 2004 to \$48.35M in FY 2013.
- Merit/Mission aid and athletic aid decreased as a proportion of institutional aid from FY 2004 to FY 2013

Recommendation #3: Targeting Percent of Need Met

USM institutions will strive to meet the 75th percentile of their peers for the percentage of need met.

Source: Common Data Set (Question H2.i.) from www.bigfuture.collegeboard.org and websites of peer institutions as noted in detailed report. Note—these data included all types and sources of financial aid awards, and this would include loans. Loans are considered to meet financial need, thus if peer institutions use loans to meet need at greater rates, then the percent of need met will increase.

- Overall, USM institutions are not meeting the average of their peers nor the 75th percentile.
- One factor is the use of loans. The goal to reduce loan debt will impact the percentage of need met.

*See the Appendix Table E on page 17 for the full list of Peer Institutions and the percent of need met.

Recommendation #4: Balancing Need-Based and Non-Need-Based Institutional Financial Aid

Recommendation 4 of the USM Financial Aid Task Force directed institutions to “1) develop a plan to phase in the allocation of any new unrestricted institutional aid funds to need-based programs, 2) whenever possible, consider financial need in awarding merit aid, and 3) take additional proactive measures to increase the proportion of institutional aid allocated to need-based programs.” This recommendation is operationally similar to Recommendation #2, but additionally looks at the institutional level to meet the recommendation.

- In Table 5b (Freshmen Cohorts) and Table 5c (Transfer Cohorts), the amount of institutional aid expended on the cohort is displayed.
- Aggregate institutional aid from all sources has increased for MDCC students.

Note: Transfer data updated for FY 2009 to FY 2013, and transfer Pell students are determined if awarded a Pell grant anytime during undergraduate career at USM. Freshmen data are updated for Fall 2006 to Fall 2012, and freshmen Pell students are determined if awarded a Pell at entry.

- Aggregate institutional aid has increased for MDCC student cohorts rising from \$3.1M in FY 2005 to \$6.7M in FY 2010 (the most recent graduating cohort of community college students). Because the students are still enrolled, the FY 2011 and FY 2012 may exceed the total institutional aid expended on the FY 2011 cohort.
- The percentage of students receiving aid from the fiscal year transfer cohorts also increased from 53% to 57% from FY 2005 to FY 2010, with a high of 62% in FY 2007.

Recommendation #6: Types of Financial Aid Awarded to Graduate Students

Recommendation 6 of the USM Financial Aid Task Force directed the institutions to allocate a portion of Perkins Loans to graduate/first-professional students. Perkins Loans are low-interest student loans awarded by colleges on the basis of need. College financial aid offices determine whether a student qualifies for federal Perkins Loans and decides the amount of the loan. Colleges that participate in the Perkins Loan Program have a limited amount of money they can distribute.

Source: MHEC Student Financial Aid Information System

- The proportion of the Perkins Loans awarded to graduate students has increased from 38% in FY 2004 to 60% in FY 2013.
- Perkins Loans do not appear to be the solution to graduate aid as once recommended. The aid program has decreased in total dollars.
- In addition, loans awarded to graduate students are nearly \$400M dollars. The FY 2013 \$4M amount of low-interest Perkins Loans have, at best, a minimal impact on total debt for graduate students.
- Beginning in FY 2013, graduate students do not qualify for subsidized Stafford Loan Programs. This action will result in graduate/professional students accumulating debt faster, as the federal government will not be paying interest payments during enrollment.

APPENDIX TABLES

The original versions of the following data tables are found in the appendix of the *Financial Aid Report FY 2007 – FY 2011* given to the USM Board of Regents Education Policy and Student Life Committee in October 2012. As part of the FY 2014 ongoing financial aid study, the tables have been revised to display up-to-date trends and outcome information.

The previous tables were directly related to the *USM FY 2004 Financial Aid Task Force* recommendations. The following tables are not related to the recommendations with the exception Appendix Table E—institution by institution data for Recommendation #3. In general, the following tables provide aggregate award amounts by source and type for both undergraduates and graduates.
