Kirwan Center Mission

The Center leverages the power of multi-institutional collaboration to increase access, affordability, and achievement for Maryland students.

Informed by the diversity of Maryland's postsecondary institutions, findings from the learning sciences, and capabilities of emerging technologies, the Center leads statewide efforts to implement, evaluate, and scale and sustain innovations aimed at student success.

MOOC

“...Our school system will be completely changed inside of ten years.”

“Undreamed of possibilities for education...”

Farrand, 1931

“Will resurrect the aural instructional techniques employed so successfully by famous teachers of the past like Socrates!”

Tyson, 1931

“There will be vast universities of the air, with courses taught by the national leaders of their fields...”

Waller, 1934

“...television is an efficient and inexpensive way to satisfy the nation’s instructional needs.”

Jones, 1957

“...will provide students access to the personal services of a tutor as well-informed and responsive as Aristotle.”

Suppes, 1976

Big claims

The greatest thing since sliced bread!

Rush to adoption

With no foundation in existing research.

Implementation difficulties

Is it even practical?

Then the research trickles in...

No significant differences.

MOOC

communication strategies differ in terms of clarity & politeness

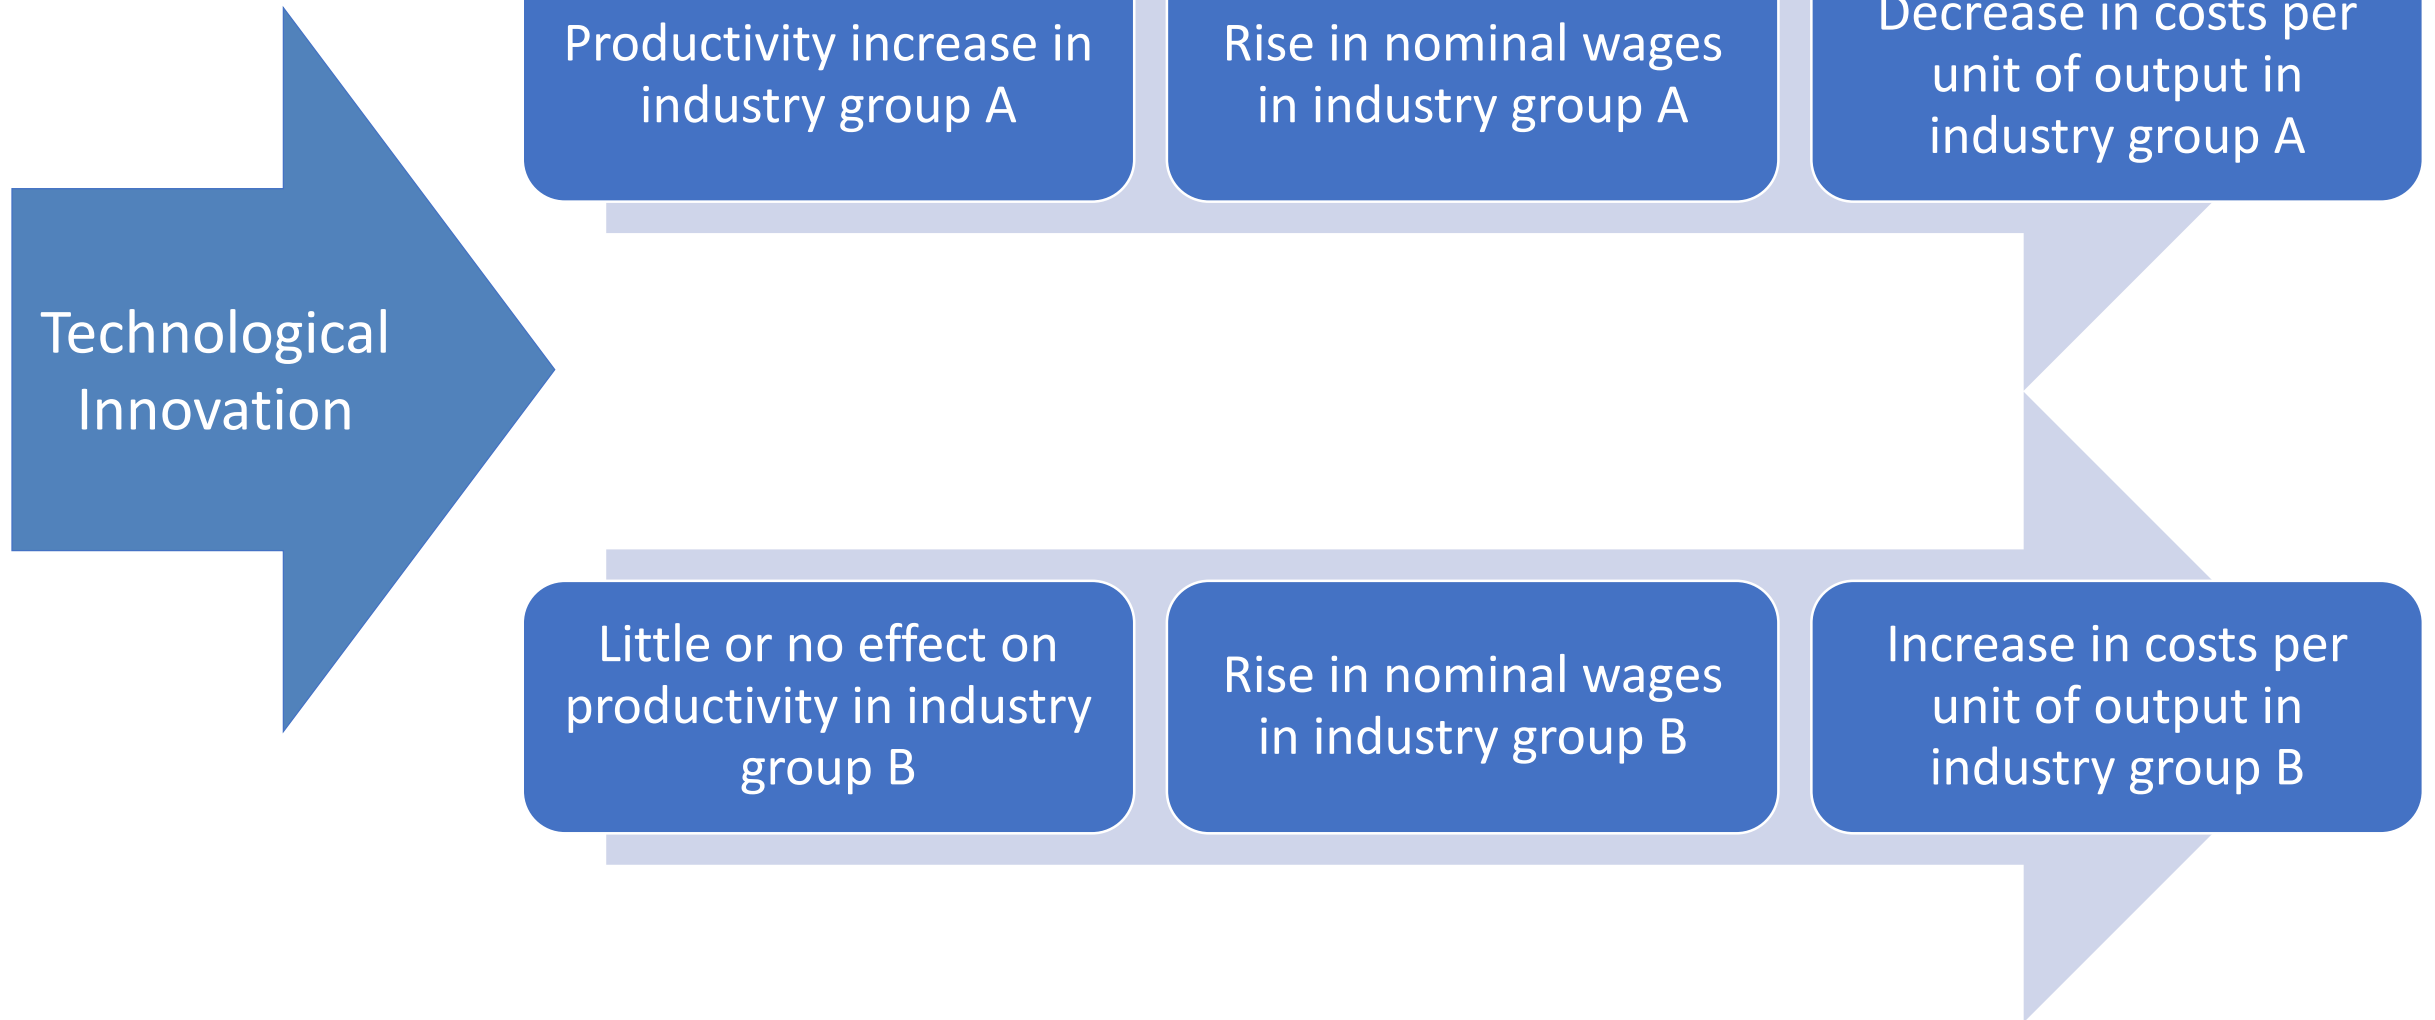

Dr. Kim in a BIG lecture hall

Baumol's "Cost Disease"

That's depressing.

How do we break this cycle?

The application of our knowledge about tools, techniques, or systems to solve practical problems.

The **application** of our knowledge about tools, techniques, or systems to solve practical problems.

The application of our **knowledge about tools, techniques, or systems** to solve practical problems.

The application of our knowledge about tools, techniques, or systems to solve practical problems.

What is the practical problem?

How to do more with less.

“Non-traditional” student?

- Over 25.
- Dependents.
- First generation.
- Financially independent.
- Took time off before college.
- Went to a community college.
- Attends part time/works full time.

What do we know about the tools?

Understanding the actions made possible.

Jacques Carelman

How do we *use* the tools?

No more business as usual.

MASSIVE

OPEN

ONLINE

COURSE

cMOOC

Virtual, international & "massive" space where students and faculty share & critique each other's projects, build community around doing.

F2F

Part-physical space where a teacher helps guide students in authentic, project-based applications of the skills and concepts introduced in the xMOOC.

xMOOC

Space where students are introduced to core skills/concepts and can do light application.

A Cengage Buffet

In a shift away from traditional publishing models, Cengage is offering a buffet of digital materials.

By [Lindsay McKenzie](#) // December 5, 2017

PIXABAY/JURALMIN

Cengage, the publisher and technology company, is offering a buffet of digital materials for one set price. Cengage's entire digital portfolio for one set price.

The new offer, called **Cengage Unlimited**, will give institutions access to over 675 course areas for \$119.99 a semester. For students taking three or four courses a semester, that's hundreds of dollars of savings a year, versus buying individual textbooks.

Cengage described the introduction of the NetFLEX model as a strategic goal of being 90 percent digital by 2020. The sales model, which historically has relied on the purchase of physical textbooks, is being replaced, however, by the introduction of rental programs. Institutions are no longer required to purchase textbooks at all due to prohibitively high costs.

'Inclusive Access' Takes Off

Hundreds of colleges are signing on to publishers' programs, with apparent momentum, while others are skeptical.

By [Lindsay McKenzie](#) // November 7, 2017

GETTY IMAGES

Major education publishers – including Pearson and Cengage – are seeing a significant number of colleges offering "inclusive-access" programs. Previously, students might have been assigned textbooks, but now they are upping whole classes of students to automatically receive textbooks rather than purchasing individually. The "inclusive" aspect of the model means that the charge is included as part of their tuition on the first day of class.

For publishers with struggling print businesses, the inclusive-access model is a lifeline. A partnership at Pearson, said it was no secret that publishers like Pearson are looking for a **drop** as a result. "The print model is really a broken business model for us, and we want to move away from print, and move towards digital."

Pearson's inclusive-access business is growing quickly, said Peyton. "Since we've implemented a repeatable and scalable model around inclusive access, we've signed agreements with more institutions."

Scott Virkler, chief product officer at McGraw-Hill Education, said that the growth of inclusive access, with its customer base doubling in the last year. Lori Hales, senior vice president at Cengage, said that Cengage, too, has seen **rapid expansion** in this space. The publisher expects its revenue from inclusive access to double this fiscal year, said Hales.

The growth is not only due to new institutions trying inclusive access, but also to existing institutions expanding it to more courses, said Hales. Typically, an institution will start with a few courses, explained Hales, said that at Cengage, which has been offering inclusive access for several years.

#Inside Digital Learning

Are Etextbooks Affordable Now?

In a bid to gain market share, publishers have slashed the cost of digital textbooks.

By [Lindsay McKenzie](#) // May 1, 2018

The application of our knowledge about tools, techniques, or systems to solve practical problems.

Open educational resources (OER)

are resources that reside in the public domain or have been released under an intellectual property license that permits their **free use and repurposing by others.**

Open is Not Just Free

Retain

- Make, own, and control your own copy of the content

Reuse

- Use the content in its unaltered form

Revise

- Adapt, adjust, modify, improve, or alter the content

Remix

- Combine the original or revised content with other OER to create something new

Redistribute

- Share your copies of the original content, revisions, or remixes with others

Achievement

Access

Affordability

Analyze

Design

Develop

Implement

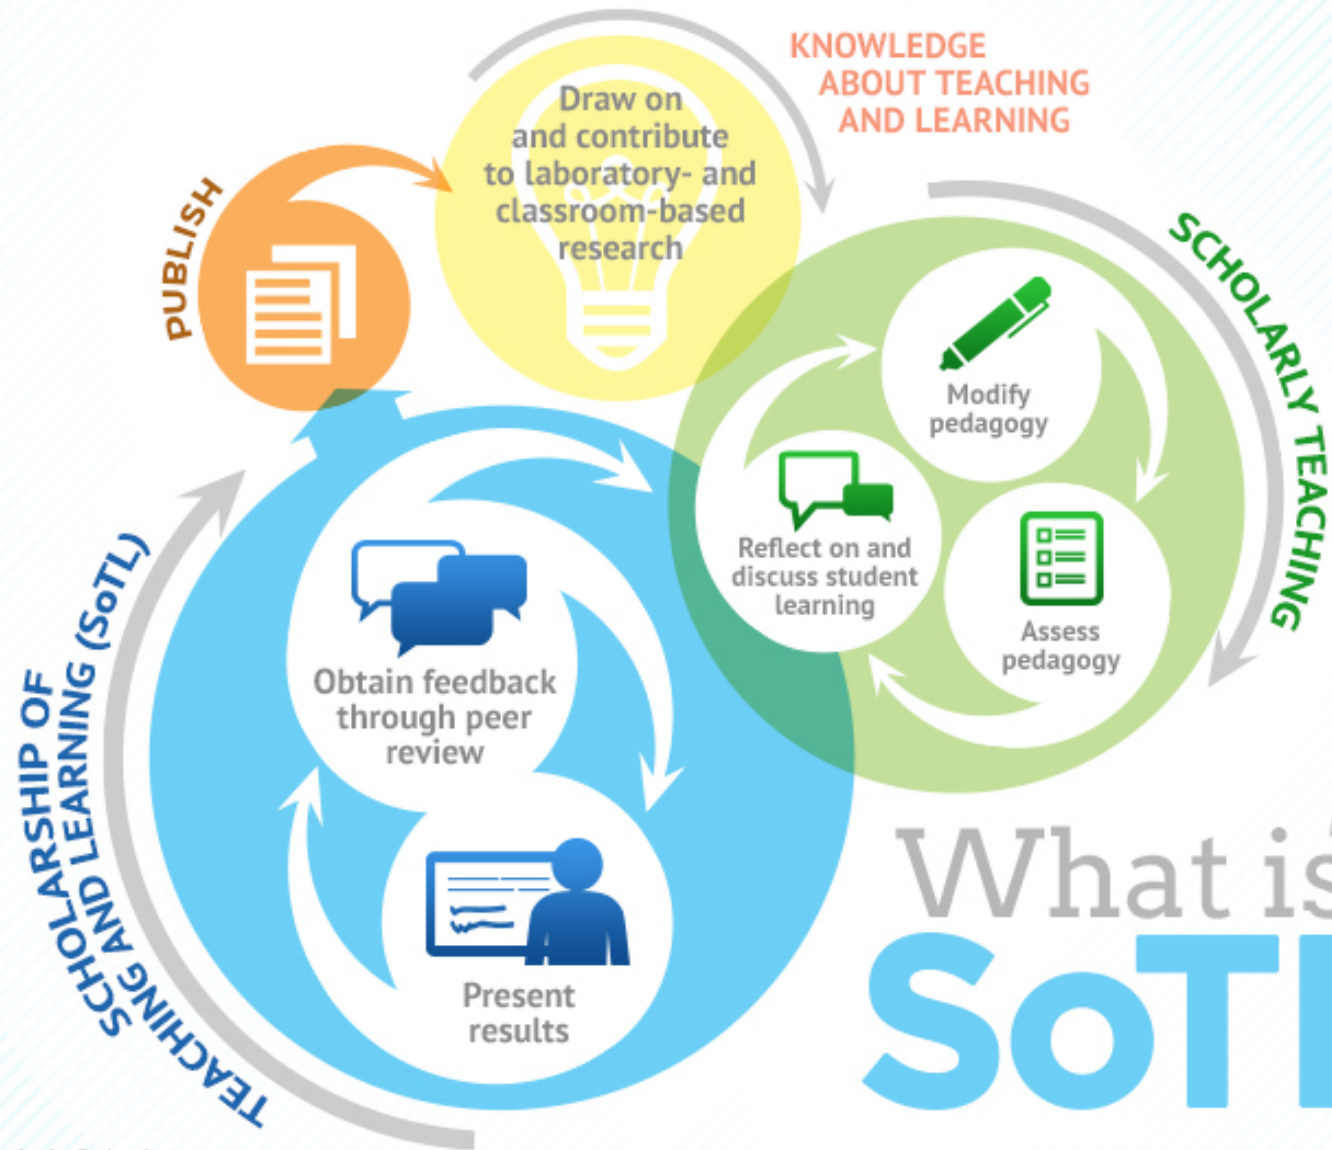

Evalute

We need...

- Digital rights and accessibility compliance services.
- Support for curation/discoverability.
- More OER materials at higher levels.
- Support for teaching and learning with OER.
- A transition plan (bookstores closing!).
- OER quality review.
- Faculty incentives.

What is SoTL?

“Improvement in post secondary education will require converting teaching from a solo sport to a community-based research activity.”

-- Herb Simon
Nobel Laureate and Professor
Carnegie Mellon University

Hewlett
Foundation

MISSION

M.O.S.T. supports long-term, statewide scaling and sustainability of fully accessible, openly licensed course materials by providing the collaborative infrastructure Maryland's public higher education institutions need to support effective and efficient OER adoption, adaptation, and creation.

M.O.S.T. is dedicated to empowering and rewarding faculty who capitalize on the opportunities afforded by openly licensed materials to optimize student learning through continuous quality improvement.

GOAL

To achieve its mission, M.O.S.T. will support statewide scaling and sustainable use of OER, leveraging the affordances of openly licensed materials to increase access, affordability and achievement for all students' success by...

- shifting the conversation about OER from being just about affordability to, more holistically, being about student success;
- supporting effective and efficient adoption, creation, and adaptation of OER to optimize student achievement;
- developing processes, models, and reward structures for sustaining the work over time.

Parting thoughts.

It's not really about OER...
