

Technology-based Course Design and Instructional Support to Foster Student Success –
Takeaways

MJ Bishop, Kirwan Center, USM

Instructional design comes first.

The benefit of tech is the portability of it... so you can reuse/repurpose after putting all of the time into it.

There are a lot of OER available.

You should not feel alone or isolated in designing a course... it should be a team approach.

Importance of sharing data with the students... how to they improve themselves?

These tools are not exclusive to 100% online courses... they can be used in F2F and hybrid courses as well.
